

Supplementary Tables

Online Table 1 - Newly reported ancient individuals

Online Table 2 - Newly reported library information

Online Table 3 - Indistinguishability of results comparing the two data processing pipelines

Online Table 4 - Previously reported data

Online Table 5 - Newly reported radiocarbon dates

Online Table 6 - Mantel tests

Online Table 7 - Dates and lower bounds of West Eurasian-related mixture in modern populations

Online Table 8 - West Eurasian-related admixture proportions estimated using *qpAdm*

Online Table 9 - F_{ST} for Pairs of Populations

Online Table 10 - Han-related admixture proportions and *qpWave* analysis of Amur Basin groups

Online Table 11 - Mongolia_Neolithic-related admixture proportions

Online Table 12- f_3 - and f_4 -statistics documenting selected findings of this study

Online Table 13 - Statistics of the form of f_3 (*Japanese; Japan_Jomon, X*)

Online Table 14 - Jomon-related ancestry proportion in present-day Japanese and Koreans

Online Table 15 - Phenotypic SNPs

Online Table 16 - Mixtures of Core Tibetan and Tai-Kadai ancestry

Online Table 17 - Groups with the largest statistics of the form f_3 (*Mbuti; Core Tibetan, X*)

Online Table 18 - ALDER test for admixture in Core Tibetans

Online Table 19 - Testing for mixture in Han Chinese using statistics of the form f_3 (*Han; X, Y*)

Online Table 20 - f_4 -symmetry tests document mixture in Han Chinese

Online Table 21 - The number of source populations for Han Chinese inferred from *qpWave*

Online Table 22 - Upper_YR_LN- and Liangdao-related ancestry in present-day people

Online Table 23 - Ancient N. Chinese more related to Taiwan than to Southeast China foragers

Online Table 24 - Tests for mixture in Mongolians using f_3 (*Mongolia ancient; Mongolia_N, X*)

Online Table 25 - *qpAdm* admixture proportion estimates in Mongolia and Xinjiang

Online Table 26 - Filtering of data for Wuzhuangguoliang individuals
